

Shells 2025: A platform for innovation and emerging IT talent

“The future of technology lies in innovation, research, and the ability to adapt to emerging trends,” said Mr. Dinesh Patil, Senior Director, R&D at Synopsys India Pvt. Ltd., Bangalore, while inaugurating Shells 2025, the intercollegiate IT festival organized by the Department of Computer Science (PG) at Kristu Jayanti College. Addressing a gathering of aspiring IT professionals, Patil emphasized

the significance of critical thinking and continuous learning in shaping the next generation of IT leaders. He urged students to embrace technological advancements and develop problem-solving skills to stay ahead in the competitive industry. The event witnessed enthusiastic participation from 150 students representing 15 colleges across Bengaluru, who showcased their technical expertise and

creativity. Shells 2025 provided a dynamic platform for young technologists to engage in innovation-driven challenges and collaborative learning experiences. The fest featured a series of competitive events designed to test participants’ technical skills, creativity, and problem-solving abilities. The highlights included Neural Nexus (IT Quiz), WebGenie (Web Design), Innowave (Product Launch), Ground Zero Showdown (Gaming), Surprise Event, Codex (Coding & Debugging), CineCode (Videography), and Augmented Paradigm (IT Manager). Each competition pushed participants to think strategically and showcase their expertise, creating an atmosphere of intense yet thrilling competition
