**Name and details of the Resource Person:** Mr. Tandava V Popuri Director ,DELL (EMC)

**Brief write up on the programme:**

Mr. Tandava V Popuri discussed about Internet of Things ,Bigdata, Artificial Intelligence, Machine Language during the seminar. He explained how Internet of Things (IOT) networks physical devices, vehicles (also referred to as "connected devices" and "smart devices"), buildings, and other items embedded with electronics, software, sensors, actuators, and network connectivity and enables these objects to collect and exchange data. He elaborated on how IoT allows objects to be sensed or controlled remotely across existing network infrastructure, creating opportunities for more direct integration of the physical world into computer-based systems, and resulting in improved efficiency, accuracy and economic benefit in addition to reduced human intervention. When IOT is augmented with sensors and actuators, the technology becomes an instance of the more general class of cyber-physical systems, which also encompasses technologies such as smart grids, virtual power plants, smart homes, intelligent transportation and smart cities, he said.

Students came to know the facts about satellite as: 1) The life time of a satellite would extend from 5 to 15 years. 2) Satellite will be kept in thermovac chamber for testing before it is sent to space. 3) Rocket weight it about 400 to 600 tones and the speed of the rocket is about 11.2 km/sec. 4) A satellite speed is about 2600km. 5) International space station has 0 gravity. 6) In 2018 CHANDRIAN 2 will be launched and by 2024 ADITYA satellite will be launched by ISRO.

### ACADEMIC YEAR 2017-2018

#### Session on Machine Learning Under Tech Giants

**Date: 15.07.17**

**Classes Attended & Number of beneficiaries:** III SEM BCA, III SEM B.Sc., V SEM BCA, V SEM B.Sc. (486 students)

**Name and details of the Resource Person:** Mr. Sawrav Roy, Senior Software Development Engineer, Amazon Fulfilment Technologies, Bangalore

#### **Objective:**

To impart knowledge on the basics of Machine learning- its types, its difference from a standard rule based learning approach, existing job profiles in this domain

#### **Brief write up on the programme:**

The session started with Mr. Roy prompting for a difference between rule based learning and adaptable learning. He quoted the difference between how a machine works when it is made to do a routine task having pre-defined set of rules and when it has find an adaptable solution. The speaker further explored the adaptable learning aspect by quoting the example of “steps involved in distinguishing between an apple and orange (for a machine)”. He emphasized that we go for machine learning when the human expertise for a task doesn’t exist or when humans are unable to explain their expertise or when the solution has to be adapted with changes in the environment. Mr. Roy, also explained the various forms of machine learning-association analysis, supervised and unsupervised learning, and reinforcement learning to name a few. Thereafter a video was played which showed the working of a simple perceptron model, multilayer perceptron, spiking perceptron and convolutional perceptron. He also emphasized that the aim of a learning algorithm is always to minimize the error loss with every passed data set and mentioned two core learning algorithms WCore and BP(Back Propagation). The speaker then mentioned about Tensor Flow which is an open source library available for ML, which can

be used to create simple to complex ML algorithms. He also mentioned that students can use Scikit-Learn that leverages Python's breadth for math and science related ML problems. Finally he concluded the session with the job opportunities available to students in this area. Two promising job profiles – one of a developer role (entry level) and second of a ML Scientist role were well appreciated by the speaker.

**Brief write up on programme:**

An Expert talk on “Rigidity of Cell test analysis by Nanopillars” was organised by Department of Life Sciences, held on 17<sup>th</sup> August 2017. The Resource Person Dr. Feroz MH Musthafa from addressed the UG & PG students on how eukaryotic cells modulate their gene expression profile and differentiation in response to the rigidity of their micro-environment. He further explained about the mouse embryonic fibroblast (RPTP $\alpha$ <sup>+/+</sup>) and human foreskin fibroblast (HFF) cells produced consistent maximal pillar displacements of ~60 nm. Dr.Feroz proved that contractile machinery is powered by a localized (up to 3 micrometers), actomyosin cassette, delineating the components of the localized contraction units is crucial to understand the sensing of the substrate stiffness by cells and has implications for cell differentiation and metastasis. The session was very informative and interactive. Students also enquired about the avenues for research in the field of Microfluidics and Microfabrication.

The talk in a nutshell, was a truly enriching and motivating experience and the students utilized this opportunity to the fullest.

### ACADEMIC YEAR 2017-2018

#### Session on Data Analytics

**Date:** 19/08/17

**Classes Attended & Number of beneficiaries:** Special Interest Group for Data Analytics from III B.Sc./BCA and V B.Sc./BCA- 120 students

**Name and details of the Resource Person:** **Dr. Jayashree R**, Professor, Department of Computer Science and Engineering, PES University, Bangalore

#### **Objective**

To impart knowledge on the basics of Data Analytics

#### **Brief write up on programme:**

Prof. Jayashree commenced the session by asking the audience's opinion about the personalized advertisements they see, while shopping through Amazon or accessing their favorite social networking site like Facebook. The idea was to throw light on the fact that these recommendations were generated based on the usage pattern of a user.

The speaker then dissected the term "Data Analytics" into two constituent terms, **data** which is arrangement of known symbols and **analytics** which is the application of some algorithm(s) on the dataset to achieve meaningful results. She quoted data analytics to be a multi-disciplinary subject involving mathematics, statistics, data management and data science based. She also gave several examples where data analytics can be applied on a day to day basis.

The professor then categorized data as unstructured, semi-structured and structured and also discussed the two common types of analytics -Predictive and Prescriptive.

Dr. Jayashree thereafter discussed the steps involved in data analytics- data gathering, data cleaning, data transformation and data modeling. She also mentioned about two data analytics tools "WEKA" and R, which can be used for performing analysis on data sets represented in .csv or JSON format. She concluded the session by playing a video of OKCupid. OKC is an American based international dating and social networking website formed by four mathematicians, entirely supported by advertisements and based on the idea of crunching the

data and solving the problem through data and analytics.

**Date:** 31/08/2017

**Resource person:** Dr.Venkatesh Krishnamurthy

**Beneficiaries:** 186

#### **Brief write up on the programme:**

An Expert talk on “MinION- a low cost, real time, potable 3<sup>rd</sup> generation sequencer for application in whole genome sequencing and metagenomics” was organised by Department of Life Sciences. The students were introduced to 3<sup>rd</sup> generation Nanopore Sequencer- MinION by Dr. Venkatesh Krishnamurthy, Director Nanopore BusinessGenotypic Technology Pvt Ltd,Bangalore .

The students were taught about how to handle the potable sized sequencer. The principle, the contraction of the instruments were discussed. It's applications such as whole genome sequencing, targeted sequencing, RNA sequencing, metagenomics, epigenetic were also talked over. This technology is also been implemented in various research areas such environmental research, human genetics, clinical research, microbiology etc. and other applied uses such as infectious disease, pharmaceuticals, industrial diagnostics, agriculture etc. The guest lecturer even talked about the advantages, efficiency of the instrument. He even mentioned about the different generation sequencer and the software Albacore used to read the sequence which gives real time data. He even talked about the importance of obtaining long reads in MinION in order to avoid error during scaffolding. The usage of the instrument and the software was explained by Mr. Rahman to the students and the teachers. At the end the queries of individuals were answered by the experts.

This guest lecture gave students and teachers an insight to the new technology in sequencing and information and knowledge to handle the sequencer.

#### **Brief write up of the programme:**

EBSCOhost is a powerful online tool that offers a variety of full text databases and popular databases from leading information providers. The School of Management of Kristu Jayanti College conducted a tutorial interactive session for the Management graduate students to learn how to use this tool in their studies and further references when required in the future. This tool comes in handy to look-up, research and discovers interesting concepts online. The database is vast and is helpful when a fresh perspective is required.

The speaker guided the students through the basic steps on how to use the portal. The first was how to search EBSCOhost and then the various features including the result list, previewing articles and images and setting preferences so as to make searching easier for the user. The basic search screen offers a simple easy-to-use searching experience. The top tool bar offers features which can include a publication locator, subject browsing and image collections. The speaker made us recognise that the features may vary based on the databases we selected. We can add or change the databases being searched by clicking the 'Choose Database' option. The window that appears on the screen will display all the databases available to us. From the window we can read a brief description about each resource by holding the mouse over the preview icon. After locating the resource to add we can click the checkbox next to the name and click 'OK'. In order to create a more targeted search we can expand the search options link to display the available limiters.

The EBSCOhost supplies a collection of 375 full-text databases, 600,000-plus eBooks, subject indexes, point-of-care medical references and an array of historical digital archives. It is no secret that when a particular assignment is given students go running to Google for information. EBSCOhost makes this a whole lot easier for the students and has all the relevant data. The speaker continued to explain how the data will not only help students complete the assignments but provides a great opportunity for them to learn and understand new things. The speaker concluded with Q&A where students enquired how the various journals and magazines that were not easily available on Google were made available on this site. The answer was that the school of management had taken a package that offered the students of Kristu Jayanti College to access all of the databases using their Student ID number to login. The session was extremely informative and the students were eager to try on the new experience at EBSCOhost.com.

**Objective:** This Event was planned to generate excitement in young people about programming and technology.

ACM-W Student Chapter, Department of Computer Science (UG), Kristu Jayanti College has joined the global movement of Computer Science Education Week by hosting an 'Hour of Code' on December 9th 2017 at our campus.

The Hour of Code started as a one-hour introduction to computer science, designed to demystify "code", to show that anybody can learn the basics, and to broaden participation in the field of computer science. It has since become a worldwide effort to celebrate computer science, starting with 1-hour coding activities but expanding to all sorts of community efforts.

The Hour of Code takes place each year during Computer Science Education Week. The 2017 Computer Science Education Week is from December 4-10. Computer Science Education Week is held annually in recognition of the birthday of computing pioneer Admiral Grace Murray Hopper (December 9, 1906).

The session was initiated by Mr. Shriharsha, Web developer at Accenture Solutions Pvt Ltd. He interacted with the students and demonstrated a Session on "Introduction to Python". This was followed by the Hour of Code Activity where students developed a project on "**Flappy Bike**" which was assisted by ACM Volunteers.

### Knowledge Enhancement Workshop on Advanced Techniques in Microbiological

**Date:** 27<sup>th</sup> to 29<sup>th</sup> November 2017

**Beneficiaries:** 50

#### **Brief write up on programme:**

The **Department of Life Sciences, Kristu Jayanti College, in collaboration with BioMerieux India Pvt. Ltd** organised a 3 day workshop from 27<sup>th</sup> -29<sup>th</sup> November 2017 on Advanced Microbiological Techniques. The primary objective behind the workshop was to create awareness among students regarding the advanced technologies in Microbiology available in the world used currently in clinical and various industries. Mr. Darlane Diukar and Ms. Merin Varghese, Scientific Support Executives, BioMeurix were the resource persons for the workshop. The workshop was divided into two main sessions, i.e., one lecture session and laboratory sessions. The workshop was designed for three days

#### **Day 1.**

##### **Preparing pure culture isolates**

Preparation of Nutrient Media

Inoculation

Incubation at 37/ 28°C

#### **Day 2**

Lecture Session: Theoretical explanation of the principle behind each test in the API strips. Mr. Darlane Diukar took the lecture session where the students were explained about the difficulties faced during the conduction of biochemical test for identification of bacteria up to species level. To overcome this, API (Analytical Profile Index) is an efficient identification tool. API is the analysis of various listed major biochemical test conveniently arranged in strips. The primary step for the proceeding with API is the orientation test. The importance of such test was well explained by the professionals. The API is been categorized into different classes of bacteria and is designed for identification of bacterial group and yeast. The new equipment was known to be less laborious and contamination risk free along with other advantages of including all major biochemical test in one strip and separate test strips for gram positive and gram negative organisms. The equipment was only used in industrial level but this is now finding application in Food Microbiology Industry and Food Quality Assurance and Quality Control. The API can also be used by students as it assures confirmatory results and would help in proceedings of the experiments without contamination.

Practical Session:

Preparation of the suspension culture from the pre-grown organisms

Inoculation of the culture in the strips using the isolated and purified culture

#### **Day 3**

Analysis of the Result and identification of organisms

Inoculated and incubated API strips were analysed for the growth and the respective reactions. Reagents were added wherever necessary. Results were analysed using software.

The demo session was conducted by Ms. Merin Varghese wherein the handling of the instrument was demonstrated and minor handling errors were notified. This ensured the minor mistakes made during the

handling of the equipment were avoided, so that results were appropriate. The session enlightened young minds with a new idea in this field and also bridged the gap between academia and industry.

### Workshop on IoT and Smart Cities

#### REPORT

**Date** : 14-15 December, 2017

**Number of beneficiaries** : 65

#### **Objective:**

To understand the emerging concepts of cloud computing. To think on critical innovations for smart cities and prototype them.

#### **Brief Write up on the Session:**

Department of Computer Science (PG) and IEEE Student Branch of Kristu Jayanti College organized a two day National Level Workshop on Internet of Things and Smart Cities on December 14 – 15 2017. The workshop was a unique event for Researchers, Academicians, students, industry leaders and decision making government officials. The event brought all the key players in IoT into a platform to examine key and critical innovations on Smart City initiatives. The inaugural function held at 10.00 AM on 14<sup>th</sup> December morning had **Mr. Syam Madanapalli**, Director-IoT, NTT Data Services, Bangalore, as the Chief Guest. Technical talks, Prototyping, Hands-on Sessions and Panel Discussion on Smart City Readiness were part of this workshop.

The two day's workshop on IoT for Smart Cities was a great opportunity to learn and understand in depth the concepts and current trends of cloud computing. It really was a word-storm session that filled our minds with the knowledge about the next big advancement in cloud computing, roof computing.

On the first day of the workshop there were sessions on roof computing and on developing smart cities in India. Later that day, we were guided on developing prototypes revolving around edge computing for various real time issues. The workshop was a hands on session on IoT for smart cities dealt with the devices, networks and cloud computing. The session was handled by Dr. Jaykumkar Singaram. The main topic for the session was RINANU semiconductor LLP, semiconductors and cloud computing.

We could practically explore and learn about how the semiconductor and the microcontroller work using COCOX IDE. The resource person also explained us how it helps us in dealing with real time scenarios like traffic control system, buses and trains and even temperature control etc.

We also worked on IBM cloud BlueMix which is one of the famous cloud service provider Dr. Jaykumar explained about various products and services of IBM cloud like analytical tools, storage area and IBM Watson for internet of things.

The session also helped us to experience, learn and develop an application through IBM Watson for IoT. Dr. Jaykumar also conveyed the knowledge about how the data can be passed to the cloud and later be transmitted and retrieved. Hence the session was concluded.

This workshop was indeed a great opportunity for advanced learning, interaction with experienced resource persons and practical sessions on cloud computing concepts and IoT.

## **DEPARTMENT OF SOCIAL WORK REPORT ON SEMINAR Cyber Ethics- A Social Work Perspective**

**Date:** 16 February 2018

**No. of Beneficiaries:** 60 (I & II year MSW Students)

**Name of resource person with details:** Mr Abhishek Clifford Jacob (CEO, RESCUE, Mysore)

### **Brief write up on the programme:**

The speaker for the seminar was Mr Abhishek Clifford Jacob, Chief Executive Officer, RESCUE, Mysore. The session began with a visual representation of a film trailer that exhibited the extremity of girls who are trafficked and abused in Western countries. The resource person mentioned the four giants faced in the worlds today which are the mass gang-rape of teenage girls, baby genocide, advertising rape and 37 million deaths of secret World War III. Human trafficking is considered the second largest criminal activity. The solution for all this kind of callous activity is cyber ethics. The suitable remedies which can be suggested for all these acts can be strengthening the media campaigns, conducting PTA meetings in educational institutions, introducing parental software, blocking porn websites across the country. The discussion ended with the question and answer session where the students raised their queries about the implementation of rules and regulations, remedies for human trafficking and the importance to eliminate such social issues from society.

### **Outcome:**

The information and the facts given by the expert speaker was an eye-opening session that helped the students in understanding the realities and the truth happening around the globe.
